Signal Problems?

zBoost® your Bars

Bring Signal Indoors with zBoost Cell Phone Signal Boosters

zBoost® supports:

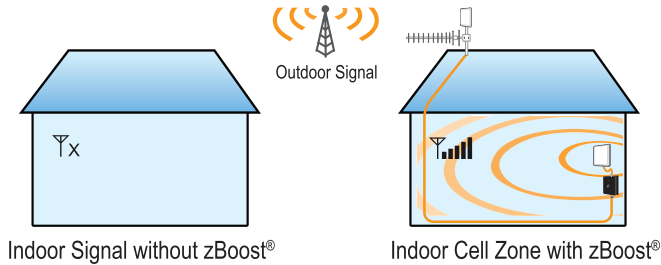

Cell Phones

Smartphones

Tablets

Wireless Data Cards

Benefits of zBoost CI Professional Signal Boosters

zBoost® Products:

- Boost indoor signal for cell phones, smartphones, wireless data cards and wireless alarm panels
- Eliminate most dropped or missed calls
- Improve signal strength for voice and data transmission
- Extend cell phone battery life
- Work with phones and devices using 800 and 1900MHz (not Nextel/iDEN, 4G, 700MHz or 2100MHz devices)
- Protect the carrier network using patented technology

zBoost YX745: Boost cell phone signal inside large homes or commercial buildings!

- Boost indoor cellular signal up to 12,000 square feet
- Improves signal for voice, data and wireless alarm panel communication
- Ideal for residential and commercial settings
- Supports multiple users simultaneously
- Exclusive zBoost model for Custom Installers
- Commercial-grade amplifier casing
- Includes high gain directional antennas for maximum performance
- Dual Band - Supports phones and devices on both 800MHz (CEL) & 1900MHz (PCS)

About zBoost By Wi-Ex

zBoost®, by Wi-Ex®, enhances the performance of your:

- Cell Phone
- Smartphone, such as, iPhone, Android and BlackBerry
- Wireless data card
- Tablet

zBoost® not only increases signal for voice transmission, it also increases signal and speed of aircards, EDGE and 3G technology.

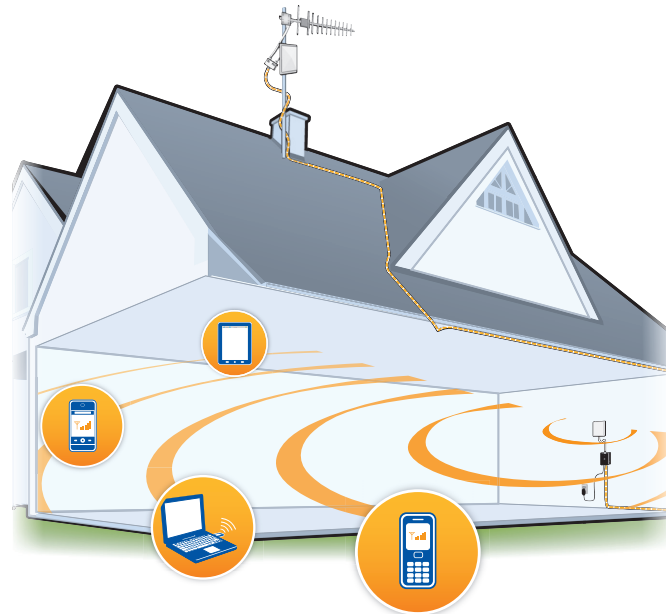

zBoost® provides solutions for the 65% of cell phone owners experiencing problems with their cell phone service, including dropped calls, poor signal reception or dead zones.

There are several obstacles that can contribute to the poor reception you receive indoors:

- Location of the cell phone tower in relation to you
- Obstructions caused by buildings, terrain and trees

zBoost® improves indoor cell phone signal by capturing and enhancing outside signal, then bringing it indoors.

The zBoost® signal booster product lines include the zBoost consumer line and the zBoost international line. Learn more at www.Wi-Ex.com.

zBoost Commercial Kits: Boost cell phone signal coverage for 20k or 40k!

Wi-Ex indoor coverage kits provide a complete solution for improving cellular voice and data signal within buildings from 20,000 to 40,000 square feet.

The kits equip professional installers with the materials, design and installation guide to execute installations for varying building configurations.

Wi-Ex indoor coverage kits use a network of active amplifiers and antennas configured to provide optimum signal strength for multiple cellular providers while protecting the integrity of the carrier network using patented technology.
